Department of Computer Science
Research Focus
"Intelligent Formal Systems"

TECHNISCHE UNIVERSITÄT DRESDEN

Colloquium

Within the seminar of the Research Focus, the Ph.D. programme "Specification of discrete processes and systems of processes by operational models and logics" presents a talk by

Prof. Dr. Bernhard Ganter
Institut für Algebra
Technische Universität Dresden

about

"Acyclic compositions of deterministic Mealy automata"

Abstract: There is a natural construction for building larger automata from smaller ones by connecting outputs to inputs. We study properties that are preserved by such a construction and use the results to analyze a childrens' toy.

No Formal Concept Analysis will be discussed!

Date:	07.06.2005
Place and time:	Willersbau, Room: WIL C129, 1.15 pm

All interested persons are invited to attend!

Prof. Dr.-Ing. habil. Heiko Vogler
